Final Project

INTRODUCTION

Website Name: [PDDTest.KZ](#)

URL: <https://pddtest.kz/>

Short Description of the System:

PDDTest.kz is a Kazakhstan-based educational platform designed to support individuals preparing to obtain a driving license. The website provides a wide range of services, including online driving school courses, theoretical exam preparation tests, assistance in obtaining medical certificate No. 073, and even grant opportunities for individuals who require financial support for their education. The platform aims to simplify and digitalize the learning process for future drivers, making driver education more accessible, structured, and convenient.

Purpose of Testing:

The primary goal of this testing project is to evaluate the overall quality, usability, and functionality of the PDDTest.kz website. Testing focuses on identifying defects, verifying core features, assessing user experience, and ensuring the platform delivers reliable and efficient services to its users.

TEST SUMMARY

Test Types Conducted:

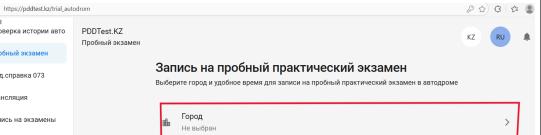

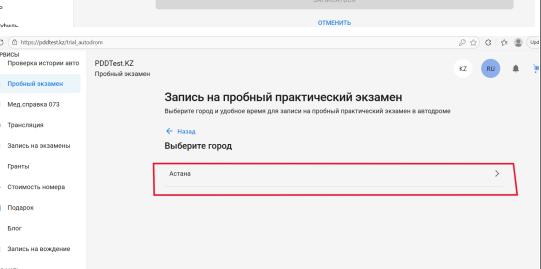

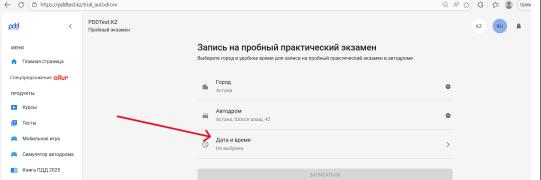

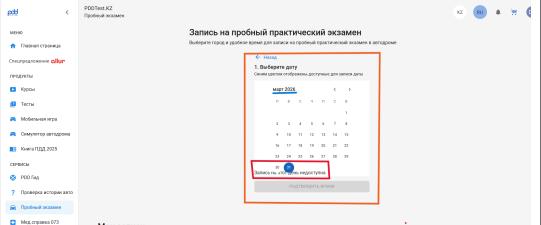

1. Compatibility / Cross-Browser Testing: To verify that the website functions correctly on different browsers and screen resolutions.
2. Functional Testing: To verify that core website features - such as navigation, registration, login - work as intended.
3. Validation Testing: To check input validation, form behavior, error handling, and basic security-related aspects such as preventing invalid or unsafe inputs.
4. Localization Testing - To verify that the website correctly adapts to different languages, regions, and cultural conventions.

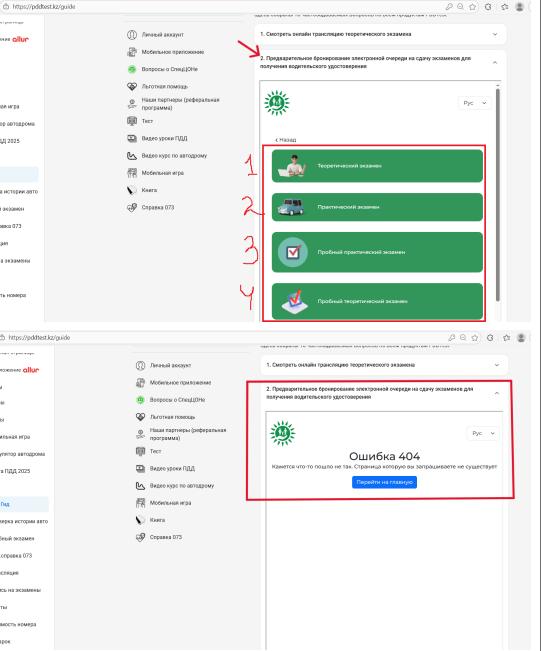

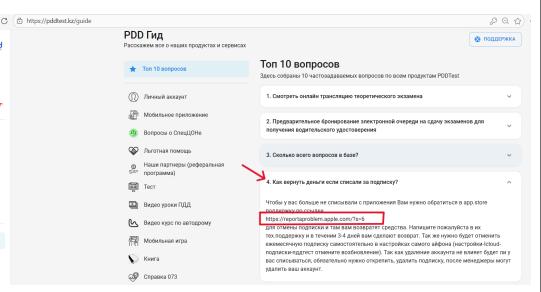

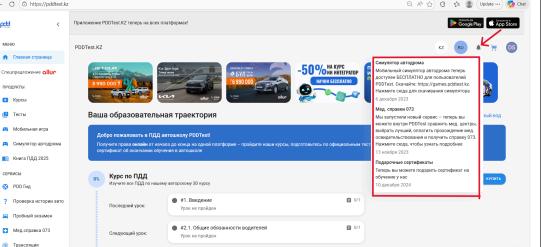

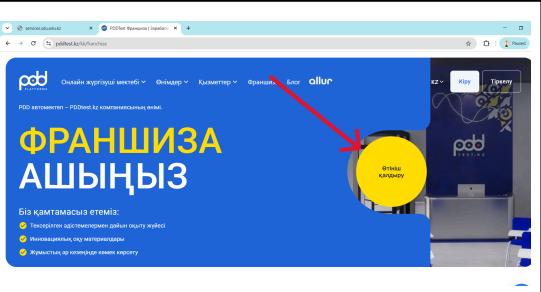

Test Environment:

Operating System	Windows 10
Browsers Used	Microsoft Edge

Devices Tested	Acer Aspire A715
Tools Used	Dead Link Checker (https://www.deadlinkchecker.com/);
Network connection	home wi-fi

TEST CASES AND RESULTS

Test Case ID	Test Case Description	Screenshot	Expected Result	Actual Result	Status
TC-FU01 link to bug ticket	When registering for a trial practical exam, the user can select only one city — “Astana”.	 	The user should be able to select any available city from the list when registering for a trial practical exam.	Only one city, “Astana”, is available for selection. Other cities cannot be selected.	fail
TC-FU02 link to bug ticket	All dates are unavailable for booking. Selecting the 30th or 31st causes UI overlap.	 	Available dates can be selected. No UI overlap occurs.	No dates are available. UI overlaps when selecting the 30th or 31st.	fail

TC-FU03 link to bug report	On the PDD Guide page, service buttons on the second question are not working and open a 404 error page. PDD Гид PDDTest.KZ		Service buttons should work correctly and open the corresponding pages without errors.	Clicking the service buttons opens a 404 error page.	Fail
TC-FU04 link to bug ticket	On the PDD Guide page, in the fourth question, the link provided for problem solutions is not clickable and cannot be copied. PDD Гид PDDTest.KZ		The link should be clickable and allow users to open or copy it.	The link is not clickable and cannot be copied.	Fail
TC-FU05 link to bug ticket	On the internal home page after login, the notification (bell) button displays old notifications without any sorting. PDDTest.KZ Главная		Notifications should be up to date and properly sorted (e.g., by date).	Old notifications are displayed, and there is no sorting.	fail
TC-FU06 link to bug ticket	On the franchise guest page, the “Өтініш қалдыру” button is not clickable when the KZ language is selected, but works when the RU language is selected https://pddtest.kz/kk/franchise		The “Өтініш қалдыру” button should be clickable and work correctly in all available languages.	The button is not clickable in KZ language, but works correctly in RU language.	fail

Compatibility Test Cases:

Test Case ID	Test Case Description	Devices Tested	Browsers Tested	Expected Result	Actual Result	Status
TC-C01	Verify website on Microsoft Edge	Acer Aspire A715	Microsoft Edge	All functions work	All functions work	pass
TC-C02	Verify website on Chrome	Acer Aspire A715	Chrome: Version 143.0.7499.40	All functions work	All functions work	pass
TC-C03	Verify website on Chrome from mobile	Samsung A52	Chrome	All functions work	All functions work	pass

BUG REPORT

Bug ID	FU-BUG-01
Title	User can select only one city (“Astana”) when registering for a trial practical exam
Steps to Reproduce	1. Open the trial practical exam registration page. 2. Attempt to select a city from the list.
Expected Result	The user should be able to select any available city from the list.
Actual Result	Only one city, “Astana”, is available. Other cities cannot be selected.
Severity	Medium
Priority	Medium
Screenshot(s)	
Explanation	Users are restricted to a single city, which prevents proper booking functionality. Fixing this allows correct city selection and avoids blocking users.

Bug ID	FU-BUG-02
Title	All dates unavailable and UI overlap when selecting 30th and 31st for trial exam

Steps to Reproduce	1.Open the trial practical exam registration page. 2.Attempt to select a date. 3.Try selecting the 30th or 31st.
Expected Result	Available dates can be selected, and UI displays correctly without overlap.
Actual Result	No dates are available. Selecting the 30th or 31st causes UI to overlap text below
Severity	Medium
Priority	Medium
Screenshot(s)	 <p>The screenshot shows a web browser window for 'PDDTest.KZ' with a sidebar menu on the left. The main form is titled 'Запись на пробный практический экзамен' (Booking for a practical test). It asks for 'Город' (City) set to 'Астана' and 'Автодром' (Race track) set to 'Астана, Шоссе Алаш, 42'. Below these fields, the 'Дата и время' (Date and time) field is labeled 'Не выбрано' (Not selected) and has a small circular icon next to it. A red arrow points from the text 'Selecting the 30th or 31st causes UI to overlap text below' to this icon. At the bottom right of the form are 'ЗАПИСАТЬСЯ' (Book) and 'ОТМЕНИТЬ' (Cancel) buttons.</p>  <p>The second screenshot shows a date selection modal titled '1. Выберите дату' (1. Choose a date) with the instruction 'Одним цветом отображены доступные для записи даты' (Dates available for booking are shown in one color). The calendar shows March 2020 with days from 1 to 31. A red box highlights the date '24' which is colored blue, indicating it is unavailable. Below the calendar is a button 'ПОДТВЕРДИТЬ ВРЕМЯ' (Confirm time) and a note 'Запись на этот день недоступна' (Booking for this day is unavailable).</p>
Explanation	Users cannot book exams due to unavailable dates, and UI issues reduce usability. Fixing ensures proper date selection and interface display.

Bug ID	FU-BUG-03
Title	Service buttons on second PDD Guide question open 404 page
Steps to Reproduce	1.Go to PDD Guide page. 2.Open the second question. 3.Click on any service button.
Expected Result	Buttons should open the corresponding pages correctly.

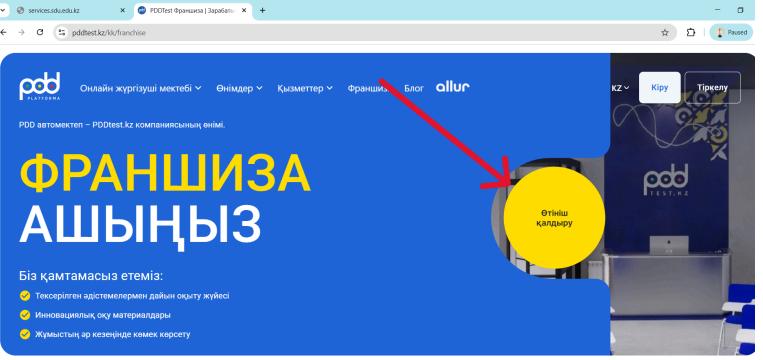

Actual Result	Clicking the buttons opens a 404 error page.
Severity	Medium
Priority	High
Screenshot(s)	 <p>The first screenshot shows a list of links on the left and four green rectangular buttons on the right, each containing an icon and text: 1. Теоретический экзамен, 2. Практический экзамен, 3. Пробный практический экзамен, and 4. Пробный теоретический экзамен. The second screenshot shows a 404 error page with the message 'Ошибка 404' and 'Кажется что-тошло не так. Страница которую вы запрашиваете не существует'.</p>
Explanation	Broken links prevent users from accessing intended services. Fixing ensures proper navigation and functionality.

Bug ID	FU-BUG-04
Title	Link in fourth PDD Guide question is not clickable or copyable
Steps to Reproduce	<ol style="list-style-type: none"> Go to PDD Guide page. Open the fourth question. Try to click or copy the provided link.
Expected Result	The link should be clickable and copyable.
Actual Result	The link is not clickable and cannot be copied.
Severity	Medium

Priority	Medium
Screenshot(s)	<p>The screenshot shows a list of frequently asked questions (FAQ) on the PDD Guide page. Question 4, which asks about getting money back from a subscription, is highlighted with a red arrow. Below the question, there is a note in Russian: "Чтобы у вас больше не списывали с приложения Вам нужно обратиться в app.store по ссылке: https://reportaproblem.apple.com/?s=6".</p>
Explanation	Users cannot access additional problem solutions. Fixing ensures usability and accessibility of resources.

Bug ID	FU-BUG-05
Title	Notification bell shows old notifications without sorting
Steps to Reproduce	1.Log in or register to the internal home page. 2.Click on the notification (bell) button.
Expected Result	Notifications should be up to date and sorted by date.
Actual Result	Old notifications are displayed without any sorting.
Severity	Medium
Priority	Medium
Screenshot(s)	<p>The screenshot shows the mobile application download page for PDDTest.kz. At the top right, there is a 'Update' button with a red arrow pointing to it. The page also features promotional banners for car models and a course on the left side.</p>
Explanation	Users may miss important updates due to outdated notifications and lack of sorting. Fixing ensures accurate and organized information display.

Bug ID	FU-BUG-06
--------	-----------

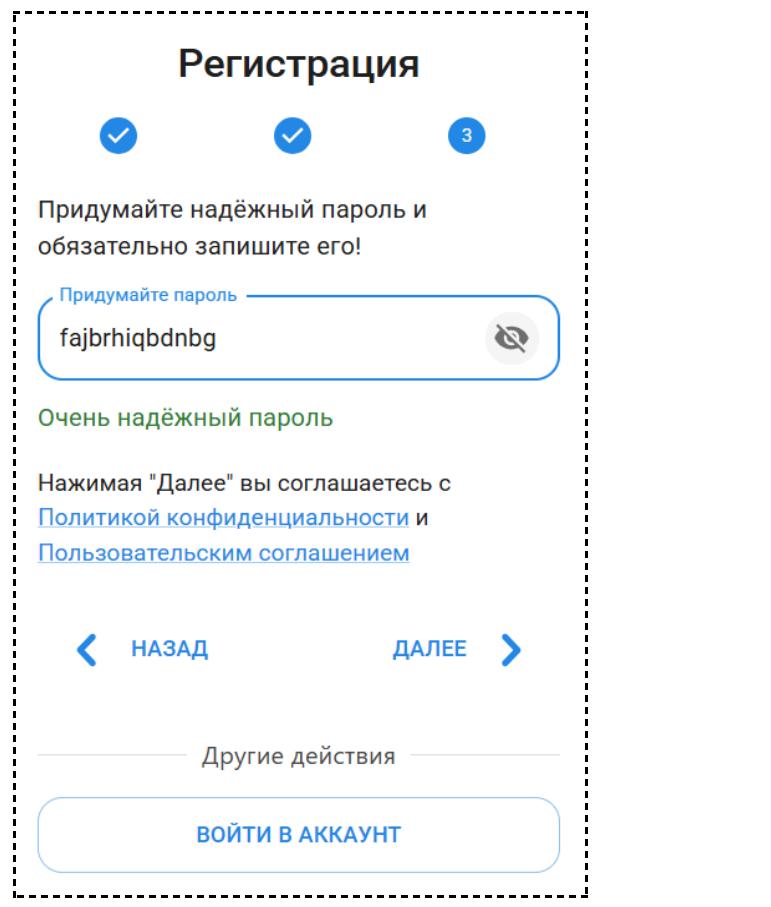

Title	“Өтініш қалдыру” button not clickable in KZ language on franchise guest page
Steps to Reproduce	<ol style="list-style-type: none"> 1. Open the franchise guest page. 2. Select KZ language. 3. Try to click the “Өтініш қалдыру” button. 4. Switch to RU language and click the button.
Expected Result	The button should be clickable in all languages.
Actual Result	Button works in RU language but not in KZ language.
Severity	High
Priority	High
Screenshot(s)	
Explanation	Users in KZ language cannot submit applications, blocking functionality. Fixing ensures consistent behavior across languages.

Bug ID	REG-BUG-01
Title	Invalid name (“4554645”) is incorrectly accepted at Stage 2 of registration
Steps to Reproduce	<ol style="list-style-type: none"> 1. Open the second stage of registration. 2. Enter an invalid name: “4554645”. 3. Enter a valid surname and choose any city. 4. Press “ДАЛЕЕ”.
Expected Result	<ol style="list-style-type: none"> 1. System must not proceed to Stage 3. 2. Error message displayed: “Некорректный Имя”.
Actual Result	<ol style="list-style-type: none"> 1. System successfully proceeds to the third stage. 2. No validation error is shown.
Severity	Medium
Priority	Medium

Screenshot(s)	
Explanation	<p>Users can register with invalid names, damaging data integrity and enabling fake or fraudulent accounts. Fixing this improves input validation, ensures accurate user data, and prevents system misuse.</p>

Bug ID	REG-BUG-02
Title	Weak password incorrectly accepted as valid during registration
Steps to Reproduce	<p>Open the third stage of registration. Enter weak password: “fajbrhiqbdbnbg”. Press “ДАЛЕЕ”.</p>
Expected Result	<p>Registration should not complete. Error displayed: “Слабый пароль” or “Пароль легко угадать”.</p>
Actual Result	<p>Registration completes successfully. No error shown.</p>
Severity	Critical
Priority	Urgent

Screenshot(s)

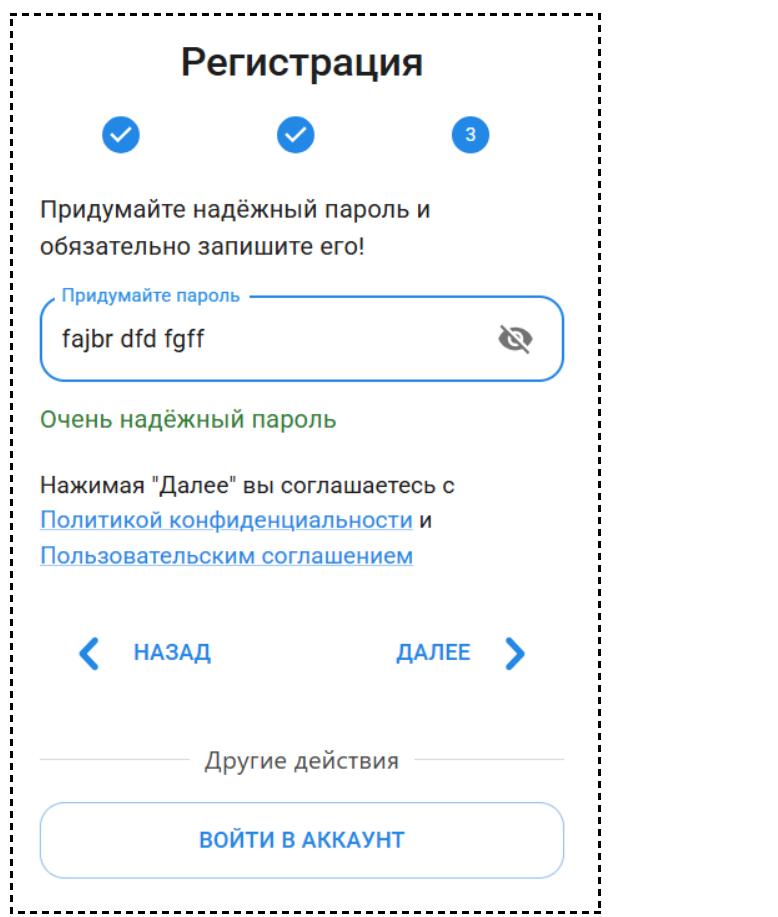

Explanation

Weak password acceptance is a **major security risk**.

Bug ID	REG-BUG-03
Title	Invalid password format accepted without validation
Steps to Reproduce	Open the third stage of registration. Enter invalid password: “fajbr dfd fgff” (contains spaces). Press “ДАЛЕЕ”.
Expected Result	Registration should fail. Error displayed: “Некорректная пароль”.
Actual Result	Registration completes successfully. No error displayed.
Severity	Critical
Priority	High

Screenshot(s)

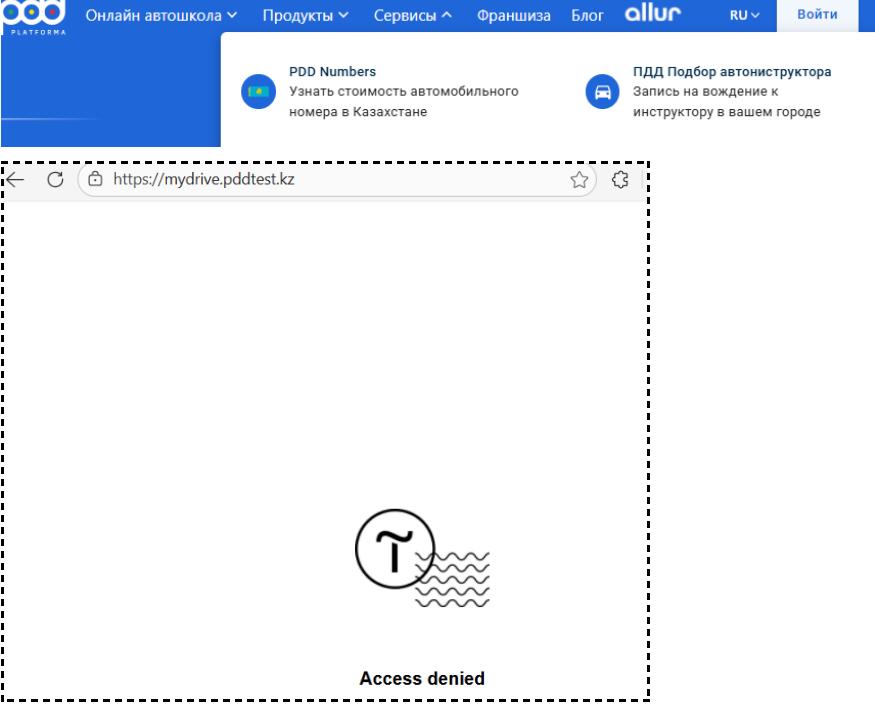

Explanation	Passwords containing spaces or invalid characters weaken authentication. Fixing ensures password formatting rules are enforced to maintain secure registration.
-------------	--

Bug ID	REG-BUG-04
Title	Password shorter than 8 characters is incorrectly allowed
Steps to Reproduce	Open the third stage of registration. Enter short password: “KX@M2\$!” (7 characters). Press “ДАЛЕЕ”.
Expected Result	Registration must not complete. Error displayed: “Пароль должен содержать как минимум 8 символов”.
Actual Result	Registration completes successfully. No validation error shown.
Severity	Critical
Priority	Urgent

Screenshot(s)	<p>Регистрация</p> <p>Придумайте надёжный пароль и обязательно запишите его!</p> <p>Придумайте пароль <input type="text" value="KX@M2\$!"/> </p> <p>Хороший пароль</p> <p>Нажимая "Далее" вы соглашаетесь с Политикой конфиденциальности и Пользовательским соглашением</p> <p> НАЗАД ДАЛЕЕ </p> <p>Другие действия</p> <p>ВОЙТИ В АККАУНТ</p>
Explanation	Accepting short passwords increases vulnerability to brute-force attacks. Fixing the rule improves account safety and compliance with common security standards.

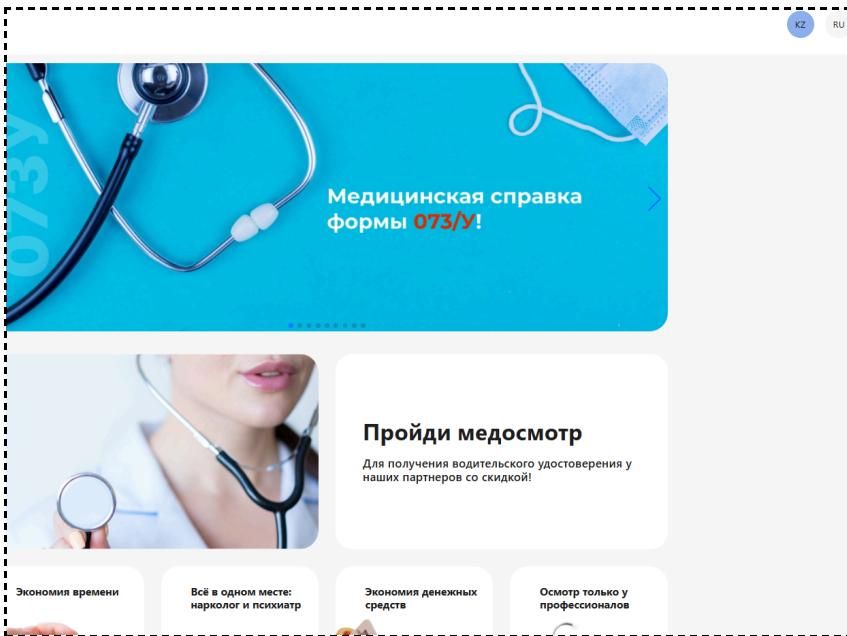

Bug ID	DL-BUG-05
Title	Link to “PDD Подбор автоинструктора” returns 403 Forbidden
Steps to Reproduce	Open the PDDTest.KZ Главная page. Click Услуги (Services). Select PDD Подбор автоинструктора.
Expected Result	The page should load successfully. User should be redirected to the MyDrive service page.
Actual Result	Dead Link Checker: 403 Forbidden Manual testing: 403 Forbidden / Access denied
Severity	High
Priority	Medium

Screenshot(s)	
Explanation	Users cannot access a key service (“Подбор автоинструктора”). This blocks the customer journey and reduces platform value.

Bug ID	L10N-BUG-01
Title	Language switch to Kazakh does not translate header dropdown items on Main Page
Steps to Reproduce	Open PDDTest.KZ Главная. Click language selector. Choose “KZ”.
Expected Result	Entire Main page, including header dropdown items, should switch to Kazakh.
Actual Result	Main content appears in Kazakh. Dropdown menu items under header remain in Russian.
Severity	Medium
Priority	Medium

Screenshot(s)	
Explanation	The header is part of the navigation system. A partially translated interface confuses users and breaks localization consistency. Fixing it improves UX, accessibility, and language compliance for Kazakh-speaking users.

Bug ID	L10N-BUG-02
Title	“PDD автошкола” page remains mostly Russian after switching to Kazakh
Steps to Reproduce	Open the PDD Автошкола page. Switch language to “KZ”.
Expected Result	Page should fully switch to Kazakh.
Actual Result	About 90% of page content remains in Russian.
Severity	High
Priority	High
Screenshot(s)	
Explanation	This is a full content page where users read critical information. Poor localization breaks trust, harms usability, and violates language support expectations. Fixing it significantly improves user experience.

Bug ID	L10N-BUG-03
Title	“Мед. справка 073” page does not translate at all when switching to Kazakh
Steps to Reproduce	Open the Мед. справка 073 page. Switch language to “KZ”
Expected Result	Full page should switch to Kazakh.
Actual Result	Page remains 100% in Russian.
Severity	High
Priority	High
Screenshot(s)	
Explanation	Medical information pages are highly important. Users who speak Kazakh may not understand critical content. Fixing this ensures accessibility, compliance, and user trust.

Bug ID	L10N-BUG-04
Title	Header dropdown menu remains in Russian on “PDD Test” page when switching to Kazakh
Steps to Reproduce	Open the PDD Test page. Change language to “KZ”.
Expected Result	Entire page, including header dropdowns, should display Kazakh.
Actual Result	Main content switches to Kazakh. Dropdown menu items remain in Russian.

Severity	Medium
Priority	Medium
Screenshot(s)	
Explanation	The issue breaks navigation consistency across the website. Users switching to Kazakh expect the entire interface to change. Fixing this improves clarity and seamless experience.

CONCLUSION

During my review and end-user testing of the PDDTest.kz platform, I identified several functionality, localization, and usability issues. While these issues do not prevent the use of the core system, they can impact user experience, data accuracy, and accessibility, especially for Kazakh-speaking users. Overall, the results show clear opportunities to improve the stability, consistency, and user trust of the platform through targeted improvements.

As a recommendation:

1. Improve this part of the system by focusing on login confirmation, password security, and basic user data.
2. Improve localization consistency by ensuring full Kazakh language support on all pages and navigation elements.
3. Improve overall user interface and usability by fixing date selection behavior, notification sorting, and broken buttons or links.
